

SOLIDA

STAINLESS STEEL SELF-TAPPING SCREW

SOLIDA stainless steel self-tapping screws can be universally applied to exterior fixing applications due to their wide range of dimensions.

Direct visible fastening or concealed reverse side wood to wood mounting is possible due to the integrated self-tapping point which delivers reduced splitting effects.

The 3-zone countersunk head has an optimised head diameter for an aesthetically pleasing appearance.

SOLIDA4 Made from A4 austenitic stainless steel, can withstand increased deformation forces and has high corrosion resistance, ideal for coastal applications. SOLIDA4 is perfect for screwing decking to wooden or aluminium substructures.

CE according to DIN EN 14592-2008

SOLIDA1 Hardened stainless steel: The high breaking torque stainless steel self-tapping screw for universal applications.

Tips & Tricks

SOLIDA4 is suitable for fixing decking boards to timber and aluminium substructures. A height distance of 6.0 mm between the substructure and the decking board reduces the shear effect on the fastener by up to 50%.

UNIVERSAL WOOD-TO-WOOD SCREW CONNECTIONS

Depending on the type of wood and application, screw holes should generally be pre-drilled and countersunk. This will reduce the torsional load on the screw, increase stability during installation and reduce splitting around the screw head.
